

6 Reasons why installing TrackTee Bay Dividers can transform your Driving Range!

1. TrackTee is a “ALL IN ONE” driving range bay divider, ball flight monitor and advertising solution.

This makes TrackTee the most cost effective and unique solution available for updating your driving range or practice facility. TrackTee adds a fun interactive experience and attracts more entertainment golfers to your facility. It's a great addition for increasing ball sales and evolving the driving range experience. Most of all, TrackTee makes the driving range more fun and gives your range a competitive edge.

2. Your customers get instant feedback in a easy to understand format.

We all know golfers like to know the distance of the balls they hit. With TrackTee there is no more guessing distances or being unsure about what club to use. TrackTee displays the total distance and ball speed on an easy to read screen. This provides the accurate feedback needed to make changes and see the results instantly. Its fun, fast and easy to use!!

3. TrackTee is accurate, durable, and requires zero maintenance.

Installing TrackTee bay dividers at your range will be a decision you will be happy with. The units are weather proof, UV stable and virtually unbreakable. This means they can handle the daily abuse of any driving range under any conditions. Once the units are installed there is no maintenance to keep up with and energy consumption is very low. If TrackTee were installed in a 30 bay range open 12 hours a day the electrical cost per year would be under \$100.

4. Protects Your Golfers Reducing The Chance Of Injury

We have all seen the different types of bay dividers available, some of them create a unsafe hazard and can result in injuries and lawsuits. TrackTee was built with safety as a top priority, it reduces the chance of a ball coming back to the tee line with its unique shaped design. This creates a safe zone as the balls are deflected onto the range. Keep your customers safe and eliminate the possibility of a lawsuit injury.

5. Minimal Disruption To Your Facility During Installation

It wont take long to install TrackTee bay dividers at your facility, a complete solution that will evolve any facility at the right price. A typical 30 bay range can be installed in 1-2 days and requires no computers, networking or complicated setup. Bolt them down, power them up using the supplied components and your finished. TrackTee can be used indoors as well for indoor golf centers or domes.

6. Monetize Your Investment with Advertising Revenue

TrackTee offers facilities a great advertising opportunity managed through TrackTee Media, a great way to get even more financial return on your investment.
